

Toolkit Training Name Tags

Using name tags at your training session will help participants feel welcome, facilitate collaboration among participants, and help you remember participants' names. To be able to read the names from a distance, you may want to request that participants only write their first names. The name tags are designed to be printed on Avery Standard 5095 name badges that can be found at your local office supply store. On the page below you will find a sheet that is completed. If you wish, you can remove the current logo and insert your own.
